SECTION 1: GB Trainee Information

Overview

The Intro to Green Building and LEED Exam prep training program is a 2-day curriculum that includes both classroom and hands on experience with performance testing equipment. This class is intended to form a strong foundation in the fields of green building and energy efficiency. It will introduce participants to a variety of topics, upon which the US Green Building Council bases its LEED certification program, including: sustainable sites, indoor air quality, green materials, water conservation, and energy efficiency. Students will gain hands on experience using state of the art building performance testing equipment and will learn about green technologies and strategies that are appropriate for Hawaii's unique climate zones. Combining building science and energy efficiency components of RESNET and BPI with core concepts indentified by LEED, will give participants a strong foundation in understanding green building strategies that work in Hawaii.

The second day is a one day LEED Green Associate (GA) Exam Preparation workshop that ties the class to a nationally recognized designation.

Instructor

John Bendon- LEED AP, LEED AP Homes, Certified Energy Rater, Building Performance Institute Analyst, Owner/Manager of Green Building LLC.

Course Information

Dates: June 21-22, 2012

Time: 8:00 am – 5:00 pm

Place: Maui College

Eligibility

- Individuals employed by or seeking employment with organizations that provide energy management services to businesses
- Independent contractors and entrepreneurs who provide or seek to provide energy management services
- Independent contractors and entrepreneurs looking to expand their skills and knowledge base of energy management
- Have not yet participated in a free training certification program through SLIM
- Individuals must have a high school diploma or equivalent

Program Participant Benefits

- Preparation for LEED Green Associate Certification
- Highly personalized attention to the unique training needs of each participant
- Excellent professional development opportunity and development of skills in current energy management best practices

Certificate of Completion

Upon successful completion of all of the GB components, participants will then be recognized and awarded a certificate of completion by the University of Hawaii-Maui College for successful completion of the program and will be prepared to take the LEED GA exam.
